

Shit I did today that was good

What did you do last month that was good? idk like that one vague thing? what did you do that was good last week? uuuh like that other one thing I guess, all the days seem to blend. what did you do yesterday? kinda just browsed Reddit and played video games.

Recording everything that was good that I did each day so that I can look back on this summer and say I did at least a couple of good things each day and didn't waste *all* my time.
